UX Designer

UX design is creating products, most commonly apps and websites, that are easy to use, please the end user and look great. It's understanding what the target user needs and how they get what they want. It's how they interact with the information and how they navigate your design. The reason there's so much demand for UX designers is that not a lot of graphic designers truly understand what's involved. It's more than slick graphics! No experience required. If you're new to UX you'll get everything you need. And if you're a seasoned pro, you'll find some easier, simpler ways of doing what you do
